Cool-Row

In-Row Precision Air Cooling

COMPANY PROFILE

Coolnet focuses on the R&D, production, and application of data center integrated solutions. As technical consulting, product supply, system integrator, and service provider, it is committed to serving customers in the fields of communication equipment rooms, data centers, smart construction, and energy management.

Our solutions include data center temperature, humidity, and energy-saving solutions, small and medium-sized computer room temperature control solutions, micro-module data center solutions, micro-module cabinet solutions, container, and modular data center solutions, communication outdoor cabinet temperature control and energy saving Solutions, cabinet temperature and humidity, and energy-saving solutions.

Has rich research and manufacturing experience in the field of data center equipment, with world-class laboratories, production testing equipment, and a complete line of key equipment rooms. And passed the ISO9001 quality management system certification, ISO14001 environmental management system certification, and the products have passed CE certification, CCC certification, CQC certification, CRAA quality certification, etc.

We are committed to "paying attention to customer needs and realizing customer value" and establishing a win-win cooperation pattern with customers. To become your most trustworthy, most grateful, most professional, most practical, and most reliable partner with the best vision. We will "make every effort to provide value for money products and services to make customers more competitive", and continue to explore and innovate.

EFFICIENT COOLING SOLUTION FOR MODULARIZED DATA CENTER

Efficient cooling solution for modularized data center

- High heat density data centers
- modularized data centers
- reducing data centers PUE
- container data center
- Improving cooling system EER
- Matching cold/hot aisle design

- Clos to Heat Source
No Rased Floor or Limited Floor Height
- Energy Efficiency Requirement
Dynaamic Heart Load
- Constantly Expansion
Increasing Heat Density
- Virtualization
Increasing IT Demand
- Cloud Computing
High/Integrated Sever/Blade Sever

- Energy Efficiency Requirement
- High integrated Server/Rlad Server
- Cloud Computing
- Virtualization

XRow is an adaptive row-based cooling system placed closeto the heat source and ideal for rack level cooling solution for data center

COOL-ROW UNIT INTRODUCTION

Introduction

COOLNET Row Cooling Precision Air Conditioning is an ideal product for inter-column cooling in green data centers. It has the industry's best cooling efficiency. The variable frequency scroll compressor uses environmentally friendly refrigerant R410A. It has excellent intelligent control and performance. Flexible cooling capacity design: can be used in 20%~100% adjustment of cooling capacity, which greatly improves the energy efficiency of ordinary air-cooled units by 33.3%~50%. The 7-inch touch screen can comprehensively display various data in the computer room and related working conditions of the unit.

Applications

- Single rack with power larger than 3kW
- High heat density computer room
- Modular DC
- Container type DC
- DC with low PUE
- Hot spot reconstruction

300MM

600MM

7 inch touch screen

EC fan

Application scenarios

COOL-ROW UNIT CHARACTERISTICS

Advanced Controller

Advanced team work function, Up to 16 remote temperature/humidity sensors
Standard RS485 communication interface, optional SNMP and TCP/IP interfaces

Efficient EC fan system

Saving 20%-30% energy compared to traditional AC motor
Soft-startup function, Low startup current
Adjust rotary speed automatically according to cooling requirements and airflow pressure, and provide airflow required
N+1 redundancy configuration of fans, ensure the airflow in case of any fan fault
Easy-maintenance designed

High Efficiency Compressor System

R410A refrigerant
Adopting scroll compressor with high reliability and energy efficiency ratio

Electronic Expansion Valve

Adjust the throttle of valve smoothly to save the energy
Wide range of operations, which can help reduce the superheat degree and improve EER
Realize cooling capacity and heat load precise matching
Quick response, realize the precise cooling

Options

Transfer switch for Dual Power Input
GPRS SMS alarm
Low-temperature startup kits
Wired Temperature/humidity sensors
Tree-way water valve

Technical Data Of Cool-Row Series DX Unit

Model	CRA013	CRA025	CRA030	CRA040	CRA050	CRA060
Air Supply	Front/Side	Front/Side	Front/Side	Front/Side	Front/Side	Front/Side
